

# Corporate Resume

## Summary

Based in Austin, Texas for over 10 years, **In-Depth Security**<sup>1</sup> provides managed information security services to deliver and maintain a “clean” computing environment. We employ the best talent, methodologies and infrastructure available to deliver 24x7 security. Our competitors find the problems but don’t fix them or they offer security products that are only part of the solution. We understand that security is not just a product, it’s a continuing service. Our services reduce risk in several areas – loss of revenue, loss of productivity, and potential negative public relations.

In-Depth Security solutions include:

- Managed Security Services
- Penetration Testing Services
- Information Security Assessments
- Payment Card Industry (PCI) Pre-audit Services
- Secure Network Design and Implementation
- Security Awareness Training
- Emergency Preparedness Services
- Vulnerability Scans and Assessments

**In-Depth Security’s** commitment and approach to providing continuous improvement to the client environment is founded on a principled project methodology - **agility**<sup>sm</sup>. **agility**<sup>sm</sup> is an effective avenue to improving service levels, communication, and customer satisfaction. Our solutions achieve these goals and provide real-world solutions for our clients.

**In-Depth Security’s** solutions are simple, scalable, modular, and complete.

## Talent

**In-Depth Security** delivers “best of breed” solutions by leveraging our domain expertise with information technology and security. Combined with disciplined project management and the **agility**<sup>sm</sup> methodology, In-Depth Security is a trusted business partner.

<b>CISSP<sup>2</sup></b>	<b>CISA<sup>3</sup></b>	<b>PMP<sup>4</sup></b>
<b>Microsoft Certified</b>	<b>Security Operations Center</b>	<b>Network Designers</b>
<b>GIAC Certified Analysts</b>	<b>Security Trainers</b>	<b>Media Developers</b>

## Clients

A stellar organization is defined by a stellar client list. **Our stellar list of clients** includes:

- The world’s leading retailer of natural and organic foods
- A world leader in the production of embedded processing and connectivity products for the automotive, networking and wireless communications industries
- The world’s largest supplier of products and services to the global semiconductor industry
- A leader in full-service investment banking and securities firm servicing both the private and institutional sectors.

## Projects

**In-Depth Security** examples of completed projects include:

- Managed Security Service providing 24x7, realtime security protection
- PCI pre-audit remediation delivering cost effective compliance
- Routine penetration testing program delivering visibility into real security posture
- Baseline security assessment identifying gaps in current security initiatives
- Secure infrastructure design and implementation protecting critical intellectual property and business information
